**Subject:** Microsoft Settlement

I believe it is important, and healthy for there to be honest competition in the marketplace, and the Microsoft Settlement does not go far enough to ensure there is any leeway or room for healthy competition. The language is unclear and unspecific insofar as what if any competition is allowable or acceptable. Please reconsider the testimony and comments you have received from the general public, as well as those more in a position to address the technical aspects of this case. Please close the gaps in the current settlement's language, so as to ensure there is healthy competition and opportunity for others to develop competing operating systems and middleware.

Thank you

Sabrina L. Nelson
